

## **Career Opportunity**

Based in Saskatoon, Saskatchewan, we currently have an exciting opportunity for a GIS Technician to join our team. Saskatoon based applicants are preferred, however the company will consider remote working options for qualified individuals.

### **GIS Technician - Overview:**

The GIS Technician will be responsible for supporting the execution of exploration programs, principally in Saskatchewan and Manitoba, Canada. You will help manage and present geospatial and geological data, working with the project teams, in support of the advancement of CanAlaska's properties through application of GIS and database management. You will be involved in the management and quality control of geospatial and geological data. You will work with management and the project teams, based in Saskatoon, to create products for news releases, presentations, reports, and corporate promotional purposes.

### **Responsibilities**

Your responsibilities will include:

- Adherence to all company policies, procedures and standards, and legislated requirements with a focus on health, safety, and the environment
- Ensure quality control procedures and processes are in place and adequate for the management of incoming geospatial and geological information
- Assist the project teams in the management, presentation, and quality control of geospatial data sets
- Work with the project teams to develop 2D and 3D GIS products and models in support of advancing CanAlaska's exploration properties
- Support the Company's transition to a new database environment, and effectively manage the transition of historical data into the new database environment
- Assist in the development of standard reports for quality control, quality assurance, display of geological data
- Work with the Geologist, Technical Services to establish and manage standard operating procedures for the collection and storage of geospatial and geological data in compliance with NI-43-101 reporting standards
- Work with the Geologist, Technical Services to identify opportunities to streamline and enhance the management, presentation, and delivery of geospatial and geological data.
- On occasion, coordinate IT requirements for CanAlaska
- Such other duties as may be assigned from time to time

## **Qualifications:**

Our ideal candidate has:

- Bachelor's degree in Geology, Geography, Geographic Information Services, or related GIS education and experience
- Demonstrated experience managing geological databases and integrating into a 2D or 3D working environment.
- Experience with Microsoft SQL Server for database creation and management.
- Well developed understanding of geospatial and database software (ArcGIS, Access, SQL Server, or related as required)
- Excellent communication and interpersonal skills with the ability to work in a fast-paced and rapidly evolving environment
- Ability to work independently on large compilation projects
- Good leadership and team operational skills
- Enthusiastic and outgoing with a proactive approach to problem solving
- Knowledge and experience in Geoscientific software (Geosoft, Target, Leapfrog, acquire, or equivalent) would be considered an asset.
- Knowledge and experience managing hardware and software functionality of a server-based network environment would be considered an asset.

## **Location**

Based in Saskatoon, Saskatchewan. Remote working options will be considered for qualified individuals.

## **About CanAlaska Uranium Ltd.**

CanAlaska Uranium Ltd. is a Canadian based junior exploration company. The company holds interest in approximately 300,000 hectares of land in Canada's Athabasca Basin. The Company is currently advancing a brand-new uranium discovery in the Athabasca Basin on its West McArthur JV Project. In addition, the Company has several other uranium-focused exploration programs planned for the coming years. The company also holds a significant land package in the Thompson Nickel Belt, Manitoba. CanAlaska employs a hybrid project generator model, focusing on the acquisition and sale of prospective projects, whilst also executing prospective exploration programs on CanAlaska's strategic holdings. The company's portfolio has attracted international mining companies as partners. CanAlaska also holds properties that are prospective for copper and diamonds.

CanAlaska is led by an experienced team of professionals with a proven track record of discovery. The Company's primary Operations Office is in Saskatoon, Canada with a corporate office in Vancouver, Canada.
