

Career Opportunity

Based in Saskatoon, Saskatchewan, we currently have an exciting opportunity for an Intermediate Geologist to join our team.

Intermediate Geologist - Overview:

The Intermediate Geologist will be responsible for assisting and supporting the advancement of CanAlaska's exploration strategies, principally in Saskatchewan and Manitoba, Canada. You will help execute on exploration targets on CanAlaska's properties through application of advanced exploration techniques and analysis of geological data sets. You will be involved in the collection and interpretation of geological data, and development of new target areas. Working with the Project Geologist, you will be responsible for assisting in leading and managing exploration programs. Remote work will be required on a rotational schedule between the office and field projects while drilling programs are active.

Responsibilities

Your responsibilities will include:

- Adherence to all company policies, procedures and standards, and legislated requirements with a focus on health, safety, and the environment
- Ensure all employees and contractors use safety equipment and operate in a safe manner
- Ensure assigned exploration activity is well designed and prioritized to maximize discovery potential in a timely and efficient manner
- Assist in proposing budgets and exploration programs including preparation and presentation of annual exploration programs and budgets as required
- During active field programs, serve as the lead Geologist on site when the Project Geologist is absent from site.
- Assist as assigned to, in coordination with the Project Geologist, plan, coordinate and execute assigned exploration programs including geological interpretations, diamond drilling, geophysical and geochemical surveys, reporting, and compilations. Track and guide exploration results as requested
- Supervise all related contractors and subcontractors when acting as the lead Geologist on site.
- Complete all geological activity as required including but not limited to core logging, geotechnical logging, sampling, QAQC, and radiometric probing.
- Complete daily, weekly, monthly, and annual reports as required for internal and external stakeholders
- Track, report, and forecast exploration project costs on assigned projects
- Mentor, train, and coach in the development of geologists and technicians
- Such other duties as may be assigned from time to time

Qualifications:

Our ideal candidate has:

- Bachelor of Science or Master of Science in Geology (required)
- Registered, or have the ability to register for, membership as a Professional Geoscientist or Geoscientist in Training in Saskatchewan (APEGS)
- Minimum 2 - 4 years of experience in early-stage to advanced-stage uranium and/or nickel exploration
- Understanding of geological software (ArcGIS, Target, Leapfrog, or related)
- Understanding of fundamental exploration disciplines, including structural geology, geochemistry, and geophysical methods
- Excellent communication and interpersonal skills with the ability to work in a fast-paced remote environment
- Technical writing and presentation skills (Word, Excel, PowerPoint mainly)
- Good leadership and team operational skills
- Valid Driver's License

Location

Based in Saskatoon, Saskatchewan.

About CanAlaska Uranium Ltd.

CanAlaska Uranium Ltd. is a Canadian based junior exploration company. The company holds interest in approximately 300,000 hectares of land in Canada's Athabasca Basin. The Company is currently advancing a brand-new uranium discovery in the Athabasca Basin on its West McArthur JV Project. In addition, the Company has several other uranium-focused exploration programs planned for the coming years. The company also holds a significant land package in the Thompson Nickel Belt, Manitoba. CanAlaska employs a hybrid project generator model, focusing on the acquisition and sale of prospective projects, whilst also executing prospective exploration programs on CanAlaska's strategic holdings. The company's portfolio has attracted international mining companies as partners. CanAlaska also holds properties that are prospective for copper and diamonds.

CanAlaska is led by an experienced team of professionals with a proven track record of discovery. The Company's primary Operations Office is in Saskatoon, Canada with a corporate office in Vancouver, Canada.
